Introduction

History of the Core-Edge Working Group

- **Established around February 2004**
- **First appearance at MIT eBiz in May 2004**
- **Started work around same time:**
 - **Conducted five case studies**
 - **VOIP, SIP, LBS, Music, RFID**
 - **Developed core-edge taxonomy**
 - **Developed core-edge methodology**
 - **Concepts of control points, gear teeth, coreness, ...**
- **Roughly bi-weekly WG meetings**
 - **Involvement of key sponsors**
 - **Dial-in provided**
- **Workshops : September 2004**
 - **May 2005**
 - **October 2005**

Let me take my co-chair hat off for a moment...

**CEWG created LOTS of material (PPT,
DOC), posted on the CFP Website**

BUT

**We need concise results that sponsors can
distribute internally to show value of
CEWG and CFP!**

Where does this leave us?

Status of current work

Consolidate material into a concise package

- **Defined deliverables (listed by priority)**
 - **Taxonomy**
 - **Methodology**
 - **Case study write-ups**
 - **Case study criteria**
- **Assigned work**
- **To be published on CFP website (“Achievements” section)**
- **Deadline: end of the year is a MUST, sometime in December is desirable to leave time for distribution**

In Addition: Core-Edge whitepaper **(TOP PRIORITY)**

- **“Introduction to the Core-Edge Story”**
- **Today: Present & discuss main messages, structure,...**
- **Goal is to have draft mid-November (incl. today’s discussions), refine, wordsmith,...**
 - **Release: ASAP**

Where do we want to go?

Future work

You'll see some today...

Let's get started!
